ANU Climate News

Dear reader

With this week's announcement of the terms of reference for the government's 2017 Climate Review, we're hoping for a thorough, insightful and transparent review of Australia's climate goals and the mechanisms for achieving them. ANU is aiming to have various inputs into this process - please contact us if you're interested in participating.

Do also stay tuned for preliminary results of the National Energy Market Security Review (the Finkel Review) on Friday.

This month we're focussing on international climate action with articles on the impact of Trump's election, Marrakesh outcomes and a worldwide shift to unilateral climate measures.

Finally, to celebrate the end of the hottest year ever recorded, we hope to see you at our Christmas Drinks on Tuesday evening, following our seminar "Can Humans Survive Human Nature? The Political Psychology of Climate Change" - scroll down for details and to register.

Regards

Professor Mark Howden
Director, Climate Change Institute
