Dear reader

The Finkel review into the National Energy Market continues to dominate headlines. As you will read in the articles below, a number of Energy Change Institute (ECI) members have provided expert commentary on this crucial issue.

I also encourage you to attend our “Finkel Review Explained” event on the evening of Tuesday 20 June. Please register for the event here.

And see below for a major announcement on ANU research into exciting new prospects for pumped hydro.

Finally, the ECI will be expanding its communications capabilities with the appointment of a new ECI communications manager, Sarah Wilson. Climate Change Institute communications will continue to be managed by Clare de Castella, who previously managed both portfolios. I would like to thank Clare for her excellent contribution to the ECI over the past two years.

Regards

Professor Ken Baldwin
Director, ANU Energy Change Institute
